

Forestry Reunion 2016

Press Release

Forestry Alumni Return to Their Roots with the Forestry Reunion at U of T, September 16-18

TORONTO, ON – The Faculty of Forestry at the University of Toronto will be celebrating its 109th anniversary this fall. To mark this occasion, Faculty alumni will host a Forestry Reunion, over three days, surrounding the St. George Campus, University of Toronto (U of T), September 16-18, 2016.

The Forestry Reunion will coincide with fall homecoming weekend and the highly-charged rivalry football game between Varsity Blues and York Lions.

The Faculty has planned seven individual events over three days for alumni to reconnect with classmates, develop new friendships, reminisce younger years and relive their frosh week, and share the experience with family. The events include:

Friday, September 16

- Dinner at Wayne Gretzky's
- Comedy show at Second City

Saturday, September 17

- Lunch with the Faculty of Forestry and Forestry Alumni Association
- Homecoming game between the University of Toronto's Varsity Blues and rival York Lions
- Dinner followed an opportunity to connect in a relaxed setting
- Optional: Late night pub crawl

Sunday, September 18:

- Sunday Brunch at Hart House

Join the Faculty of Forestry staff and alumni association for one, or all of the events, as old friends renew connections and relive memories in the halls of the Earth Science Building and other historical buildings on the U of T campus.

Registration will open June 1, 2016. For more information and to register for events, please visit www.forestryreunion.ca.

About the Faculty of Forestry

The Faculty of Forestry was established in 1907 at the University of Toronto. Bernhard Eduard Fernow was the first Dean and North America's first practicing professional forester. Today, the Faculty of Forestry is a unified body of interdisciplinary, diverse, dedicated and innovative natural, engineering and social scientists. The faculty is on the leading edge of research in:

- Forest conservation science,
- Forest ecosystem management,
- Forest governance and policy, and
- Biomass utilization for sustainable bio-based materials and chemical products.

The Faculty of Forestry provides unique, integrative and applied education in the above educational domains. The faculty offers 25 core courses throughout the year. The programs produce future leaders in these same fields, and our research informs the practices and decisions of current leaders tasked with successfully managing the competing demands placed on Ontario's, Canada's and the world's forests in the context of social and environmental change.
