

Research Primates on the Kenyan Coast

Working to conserve Diani's six primate species and their forest habitat

Answer important conservation questions by collecting and/or analyzing data on:

- Deforestation-tree phenology, tree seed balls
- Road crossing behaviours of four primates
- Primate issue assessment—Crop raiding, Hotel assessments
- Weaning in wild colobus infants
- Effectiveness of primate electrocution mitigations
- Effectiveness of aerial canopy bridges
- Male colobus relationships in an infanticidal species
- Monkey population dynamics
- Monkey ecological range expansion over time
- Plus much more...
