Study Abroad Programs (6 credits each)

- Be part of the **Veterinary Field Study** in South Africa, intended for pre-vet, veterinary science & veterinary technology students. Learn about wildlife veterinary science, wildlife diseases and medicine, animal care, and participate in capture operations.
- **Wildlife Conservation** in South Africa with an emphasis on field techniques, sustainable resource utilization, ecosystem and biodiversity conservation, game reserve management, and game capture operations.

Internships

- Work on a **Reserve in the Greater Kruger N.P.** in South Africa monitoring wildlife populations and biodiversity, surveying vegetation, and managing the park.
- The **Carnivore Conservation** program in Namibia includes radio tracking of released predators, camera trapping, collecting field data and practicing animal care.
- Take part in **Marine Conservation** to study shark behavior, Cape Fur seals, whales, assist with penguin conservation, enjoy shark cage diving and whale watching.

Volunteer

- Volunteer in **Wildlife Care & Rehabilitation** at a wildlife sanctuary in Namibia. Activities include hands-on animal care, enrichment activities, food preparation, cleaning and maintaining enclosures, game counts.

*All programs include airport transfer, accommodation, 3 meals a day.
Book online and secure your space on these incredible programs in Africa.*
