Be part of this 3 week [Veterinary Field Study](#) in South Africa, intended for pre-vet, vet tech and veterinary students. You will learn about wildlife veterinary science, wildlife diseases and medicine, participate in capture and care of wild animals, gain an insight into breeding of rare species, wildlife rehabilitation, ecosystems and biodiversity conservation.

Students earn 6 credits from the North West University after completion of the program.

Enhance your knowledge by joining the [Wildlife Conservation](#) program in South Africa with lectures, discussions and hands-on activities in field techniques, sustainable resource utilization,

ecosystem and biodiversity conservation, game reserve management, hands-on game capture operations, and are offered through lectures, field work and interactions with field veterinarians, biologists and conservationists.

Students earn 6 credits from the North West University

after completion of the program.

These programs include airport transfer, transportation, accommodation, three meals a day, park entrance fees, and activities.
