

FORSITE Management Specialists Internship (British Columbia)

Please contact Martha directly if you are interested in this position.

<https://www.forsite.ca/>

I graduated from the MFC program in 2019 and am currently working in Smithers, BC for a consulting company. I remember it being quite daunting trying to find industry summer positions in my year as there weren't many connections provided by the school. I wanted to reach out and let you know if any students are looking for experience in silviculture (that is the department I am supervising) they are more than welcome to reach out. A typical summer generally involves planting supervision, surveys, and some work on government wildfire contracts.

Hope you are well!
